"It is a rare and humbling privilege to be able to do what I do as a plastic surgeon. I make people happy and change people's lives and their outlooks every day." Dr. Paul Vitenas is a board certified plastic surgeon with 25 years of surgical experience. Dr. Vitenas is dedicated to the fine art of achieving beautiful and natural results in the safest possible environment and with the greatest attention to detail. He believes each patient is unique and therefore deserves a personalized plan to achieve their individual desired results. This requires excellent communication and the cultivation of trust between patient and surgeon, ultimately resulting in mutual agreement on patient goals. "We want our patients to feel welcome in our office so that we can establish long-term relationships."

Dr. Vitenas and his staff believe in the relentless pursuit of perfection and see no substitute for trying to achieve that objective with all that they do. "Above all else, I can not

overemphasize the importance of the artistic abilities necessary in a cosmetic surgeon. Your plastic surgeon should be not only well-trained and technically capable, but artistically gifted as well. We hope to have the opportunity to discuss your particular wishes and goals in the near future, and look forward to designing a plan to make your vision a reality."

Focus: Cosmetic Surgery
